PROFESSIONAL EXPERIENCE

The Goldman Sachs Group, Inc.

Software Engineer Analyst

Texas, United States

September 2024 – Present

- Developed 5+ backend microservices for the Orchestrator Payment Engine from the ground up using Java Spring Boot, Camunda, Kafka, and AWS, enabling processing of **10,000+ real-time payment transactions per day**.
- Implemented SWIFT and Fed payment gateways covering inbound/outbound message validation and routing across international and domestic rails, **reducing transaction processing errors by 30%**.
- Designed and enhanced Camunda/Zeebe workflows for payment routing, exception handling, and SLA-driven retries, **improving payment success rate by 25%** across multi-rail decision logic.
- Integrated Kafka-based event streams enabling **sub-100ms latency** asynchronous communication between 8+ upstream and downstream services, maintaining **99.9% SLA compliance**.
- Owned and delivered the Reconciliation Service end-to-end (built from scratch), **improving reconciliation accuracy by 40%** and reducing manual intervention by operations teams.
- Managed the Alerting Service, implementing **15+ new alert rules**, **reducing mean time to detect (MTTD) incidents by 35%** and improving overall system observability.
- Developing **WIMP (Where Is My Payment)**, a centralized payment visibility service that exposes standardized APIs and shared libraries consumed by **upstream and downstream services** to query real-time payment status and payload, eliminating point-to-point integrations across teams.
- Led regression and production validation across **3+ major releases**, achieving **zero critical post-deployment incidents** over 6 consecutive release cycles.
- Reviewed **100+ merge requests**, enforcing coding standards and best practices that reduced defect escape rate by **20%** in production.

Accenture Solutions Private Limited

Associate Software Engineer

Hyderabad, India

August 2020 – June 2022

- Developed a high-performance CRM web application for William Demant using Java and Spring Web Flux, handling real-time reactive data streams and improving application responsiveness for end users.
- Built an end-to-end automation testing tool for report management workflows, **reducing manual QA effort by 60%** and ensuring accuracy across **10+ report types** and validation scenarios.
- Designed and deployed **3+ microservices** to ingest, parse, and persist large-scale Excel datasets (**500K+ rows**) into relational databases, **reducing data processing time by 50%** compared to manual workflows.
- Established RESTful and event-driven communication protocols between microservices, ensuring reliable data flow and decoupled architecture across distributed services.
- Implemented CI/CD pipelines using Jenkins and GitLab CI, **cutting deployment time by 40%** and automating build, test, and release stages; enforced code quality via SonarQube, maintaining **code coverage above 80%**.

EDUCATION

The University of Texas at Dallas

Master of Science, Computer Science — GPA: 3.45/4.0

Texas, United States

August 2022 – May 2024

- Coursework:** Database Design, Machine Learning, Algorithms, Big Data Management and Analytics, Web Programming.

GITAM Deemed University

Bachelor of Technology, Computer Science and Engineering — GPA: 8.81/10

Visakhapatnam, India

June 2016 – June 2020

- Coursework:** Operating Systems, OOP in Java, Data Structures in C, DBMS, Compiler Design, ML/AI.

TECHNICAL SKILLS

Languages: Java, Python3, JavaScript, SQL

Frameworks & Libraries: Spring Boot, Spring Web Flux, Spring MVC, Mockito, JUnit, REST APIs

Databases: DynamoDB, MongoDB, MySQL, PostgreSQL

Messaging & Event-Driven: Apache Kafka, Kafka Streams

Workflow Orchestration: Camunda, Zeebe

Payment Systems: SWIFT Gateway, Fed Payment Gateway, Real-Time Payments (RTP)

Cloud & DevOps: AWS (EC2, S3, Lambda), Docker, Jenkins, GitLab CI, Git

Architecture: Microservices, Event-Driven Architecture, Distributed Systems

Tools: SonarQube, Postman, JIRA, Confluence

Authorized to work in the U.S. under valid H-1B status
